A WORLD OF WATER FOR YOUR HOME
FASCINATING – INSPIRING – UNIQUE

LIVING WATER

LIVING WATER

Your new source of inspiration: an OASE AQUARIUM

STYLE YOUR LIVING SPACE WITH WATER

Enjoy the natural world inside your home with a feature based on Earth's most fascinating element: water. An aquarium can be a source of inspiration and delight; a feature that can simultaneously revive and soothe you. At OASE, it is our mission to create sustainable living spaces with water as their centrepiece. With this in mind, our developers have combined stunning, creative design with the best technical systems to produce the OASE range of aquariums presented over the following pages.

Dive into the fascinating underwater world with help from OASE – beginners and experienced aquarium owners alike will find plenty to explore. Choose an OASE aquarium to transform the flow of water into an inspiring part of your life that offers a new perspective every day. And find out why an OASE aquarium is a piece of design that will enrich any living space.

The world of OASE

FOR MORE THAN 70 YEARS

Choosing an OASE product means choosing a world that will always be overflowing with fresh ideas and sparkling with innovative solutions. Our dedicated developers and creative designers have studied all areas of sustainable design relevant to creating living spaces with water. They specialise in everything from tranquil water gardens and impressive public fountains to smaller projects that bring the natural world indoors with our aquariums range.

We offer all the items you need to set up, operate, maintain and regulate your system with smart controls. Our products work in harmony and every detail is optimised, particularly with regard to environmental considerations, efficiency and sustainability.

Whatever dreams you may have for a living space enhanced by water, you can make them come true with OASE. And this is especially true of elegant interior design with an aquarium as its centrepiece. Discover our range for yourself!

THE WORLD OF OASE

Our quality

GETTING EVERYTHING JUST RIGHT

Our passion for sustainable design with water inspires all of our ideas and products. Our quality standards are just as important. They drive everything we do, encouraging us to question the solutions that already exist and making sure that we get even better with every stage of OASE development. Our standards ensure that quality becomes part of the OASE experience. Let us explain what we mean.

1 OASE is a fountain of ideas. 2 All our testing is done by hand ... 3 and in line with the latest procedures at our laboratories.

QUALITY FROM THE OUTSET

At OASE, quality is one of our first considerations when we start planning and developing a product. Our expertise, creativity and passion flow together, culminating in our promise to always go one step further. This gives us a clear objective: To ensure that our fascination with water, in homes or in gardens, can be sustained for many years to come.

PLANNED, MANUFACTURED AND TESTED WITH DEDICATION

Our specialists work hard to deliver OASE quality in a tangible form. Initially this means plenty of discussion, followed by specific development stages at our own laboratories. We use test reservoirs for our outdoor and aquarium products to help us move through the final important stages to the finished product. Water features that eventually bubble energetically, flow harmoniously or surge powerfully have all undergone rigorous testing. It is only once everything runs smoothly that our products get the OASE seal of approval.

INNOVATION WITH OFFICIAL ENDORSEMENT

Many companies claim to be innovative. But it is not just OASE product concepts that show we have succeeded. It is what hundreds of happy OASE customers say about using these products every day. And what the prestigious TOP 100 initiative confirmed when OASE was once again named as one of Germany's top 100 innovators for 2022.

DESIGN – OUR TRUE QUALITY BENCHMARK

The quality of a product needs to shine through in its design. And that is why perfect functionality is always combined with ideal form at OASE. This approach is especially true of our aquariums. Our high-quality aquarium tanks, elegant cabinets and virtually invisible technology are combined to create a piece of design made to be enjoyed. And one that emphasises how fascinating underwater landscapes can be.

Our responsibility

PROTECTING OUR WATER GUIDES OUR PASSION

Water is essential to us all. It is the source of all life as well as being a habitat for countless animal and plant species. Designers who work with water must deal with this precious element responsibly. And we would not want it to be any other way. Our sense of responsibility takes as many different forms as the options available to you through OASE products.

A RESPONSIBILITY THAT DETERMINES EVERYTHING

Our sense of responsibility flows through our work and our products like a river. Considerations of sustainability and our environmental impact are the starting point for every idea that we develop here at OASE.

ENVIRONMENTAL AWARENESS IN EVERY DETAIL

As well as being perfectly adapted to the biology of water, our products are also highly energy efficient and are manufactured in the most environmentally friendly way possible. OASE is a certified ECOPROFIT company, meaning we are committed to improving environmental protection while promoting sustainable economic and ecological development.

We use a carbon-neutral printing process for our packaging and product catalogues, some of which are produced by print shops that prioritise FSC-certified material. In addition, we have put measures in place to prevent plastic waste and have been using only green electricity at our German sites since 2020.

COMMITTED TO BIODIVERSITY

To show just how serious we are about protecting water habitats and their inhabitants, we have made a commitment that stretches well beyond our development and production processes.

We were the first company in the world to become an official partner of Shoal, an international campaign committed to preserving the biodiversity of fresh water ecosystems. One of this organisation's many important projects that we support is the search for fish species believed to be extinct.

OASE aquariums

THE START OF A NEW GREAT PASSION

At OASE, we have been using our knowledge and expertise to design water features for many decades. Our passion for water has never diminished during this time. In fact, it has encouraged us to commit to another goal: To bring our fascination with water habitats into people's homes with OASE aquariums.

Aquariums are enriching. They invite you to discover, dream, immerse yourself in something different. The harmonious flow of water has a calming, almost meditative effect. Investing in a high-quality aquarium is equivalent to adding an elegant and much-admired piece of design to your living space.

Our enthusiasm was the driving force. Our extensive expertise was the foundation. And our quality promise shaped the OASE aquarium range. We have three aquarium product lines to choose from. Each has its own merits but all three offer a perfectly coordinated range of technology, care products and accessories.

WE HOPE YOU ENJOY DISCOVERING WHAT WE HAVE TO OFFER!

OASE AQUARIUMS

A to Z of our entire range

FROM AQUARIUMS TO ACCESSORIES

Owning an aquarium is even more of a joy when it is easy to maintain once you have set it up. Having an aquarium is certainly a responsibility but the perceived effort of maintaining one should not stop you from realising your dream.

OASE makes it easy for you to enjoy your hobby in the most convenient way possible. Whether you are a complete beginner or developing your skills to become a professional, our range includes everything aquarium owners need: from basic equipment to specialised accessories, plus technology, care products, food and even smart control options via the OASE Control app – a perfectly coordinated system to make the aquarium as self-sufficient as possible.

Our goal is to make it possible for everyone to create their own underwater world and enjoy it for many years to come. That is why "everything from a single source" is more than just a promise. Our modular, well-designed complete range is the tangible result.

We have thought of everything

AQUARIUMS

Our high-quality, handcrafted tanks offer the perfect setting for your underwater landscape. The stylish, flush design ensures that exploring the natural world always takes centre stage. OASE aquariums are available in various sizes, from a compact 75 litres (StyleLine) up to a generous 580 litres (HighLine).

FISH FOOD

ORGANIX is a new addition to our product range and is one of the highest-quality fish foods in the world. It is MSC-certified and rich in natural, perfectly matched ingredients so that you can offer a balanced menu. The optional OASE automatic fish feeder can look after your aquarium inhabitants when you are not there.

SYSTEMATIC MAINTENANCE

Excellent water quality is key to getting unadulterated enjoyment out of your aquarium. And being able to enjoy it for a long time means testing, cleaning, treating, enriching and maintaining the water. This may sound complicated but is in fact very easy with the **AquariumActiv** care series, which has everything you need, including a water conditioner and an algae remover.

SMART CONTROL SYSTEM

Transform your aquarium into a smart home! The **OASE Control** app allows you to easily control the pump and lighting from your smartphone or tablet.

TECHNOLOGY

Reliable technology helps plants to grow and aquarium inhabitants to thrive. OASE is a leader in this field thanks to our aquarium pumps, OASE filter technology, UV clarifiers for eliminating bacteria, aquarium heaters and energy-efficient LED lighting.

When sophisticated quality standards and sustainable resource management come together, minimal maintenance and cleaning are required. Our technology also works perfectly with the aquarium designs, which provide space for everything to be tucked away almost completely out of sight.

ACCESSORIES

Everything else that you need to take care of your aquarium. From interesting decorative elements to handy nets and useful care tools.

OASE AQUARIUMS

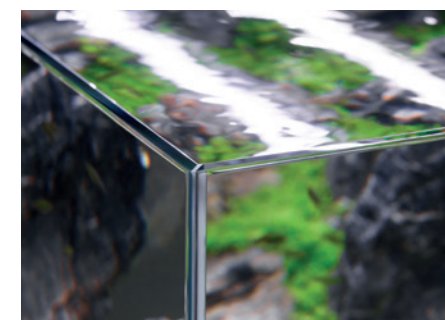

ScaperLine aquariums

Breathtaking landscapes, impressive formations and vibrant plants – aquascaping is the art of designing underwater worlds. The aquarium becomes a living work of art. And there is no need to hold back. If you love this type of aquarium, the OASE ScaperLine offers everything you need to make your dream a reality.

TRUE PERSPECTIVE

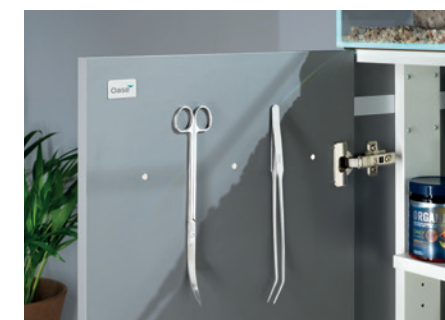

A successful aquascaping design is a pleasure to behold. The sense of depth takes you to a whole new dimension. You need a reasonable amount of space to create this effect but in exchange the OASE ScaperLine will blend in perfectly with its surroundings.

TECHNOLOGY AS PART OF OUR PHILOSOPHY

OASE is keen to always offer an interesting extra detail, such as the magnetic tool holders in the door of the spacious cabinet. These holders provide space for scaper tools to be stored away, making your hobby even more convenient.

The cable bushing in the cabinet can be closed using a clever magnetic system

MANUFACTURER-QUALITY DESIGN

Functionality and design complement each other; the aquarium and the cabinet combine to form a single unit. Our ScaperLine aquariums are available in three sizes between 75 litres and 250 litres, offering plenty of space to create fascinating underwater landscapes.

The innovative ScaperLine series includes a range of options and finishes to make it the ideal choice. This claim extends to all of our materials, products and technology.

that makes it almost invisible. The entire cabinet has received the "Made in Germany" quality seal.

The ultra-clear glass showcases the authentic, vibrant colours within the aquarium. The glass is mitre cut and glued together by hand, creating an almost seamless look and a stylishly luminous frame for your living work of art.

HighLine aquariums

The OASE HighLine series is our flagship range of premium aquariums. These aquariums take centre stage wherever they are positioned, captivating viewers with their underwater landscapes. You can let your imagination run free. These tanks offer plenty of space to create the most unusual underwater worlds.

BEAUTIFUL AMBIANCE

Despite the minimalist design of the tank and cabinet, a HighLine aquarium always looks stunning. The clean lines of the design succeed in looking good without distracting from the living world within.

Unique details are what make these aquariums so appealing, such as the individually adjustable feet and high-quality brushed aluminium panels. The panels are a highlight of the design and at the same time help to disguise any limescale deposits.

PERFECT FORM

Go ahead and think big – the bigger the tank, the less maintenance required.

These aquariums are available in six different sizes from the HighLine 125 to the HighLine 600. However simpler maintenance is not the only reason for the range. As our star product, our intention was to ensure that this series offers everything even the most discerning aquarium enthusiast could need.

TECHNICALLY SUPERIOR

All of the technology, from the lighting to the filters, can be configured to suit your unique requirements. The OASE Control system transforms this aquarium into a high-tech product, allowing the pump functions and lighting to be controlled via a smart app.

Other convenient features include the extendable filter drawer and the cover, which can be opened all the way and has a practical food flap.

OASE AQUARIUMS

StyleLine aquariums

Our most compact aquarium series is not just for beginners. After all, the StyleLine sets contain everything required for even the most sophisticated aquarium set-up. The thing that makes this series so enticing is the fact that you can get started right away. A complete StyleLine set includes the glass tank and cabinet plus the appropriate aquarium technology for filtration, heating and lighting.

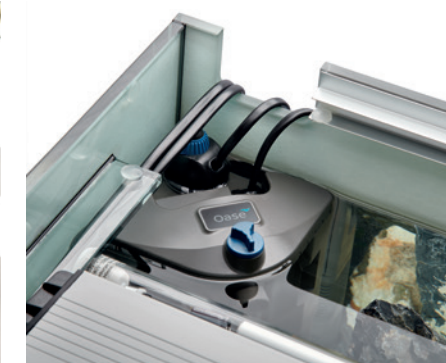

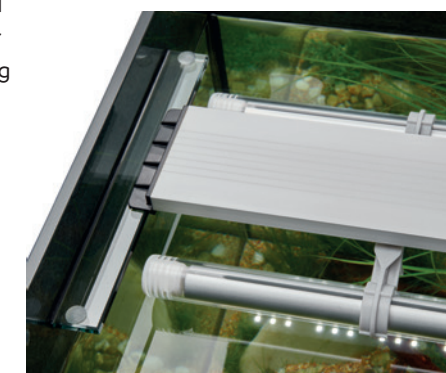

A HIGHLIGHT OF ANY ROOM

A StyleLine aquarium fits seamlessly into any living space, enriching anywhere from an open-plan living and dining area to a teenager's or child's bedroom. The smallest product in the series can even fit into niches and other spots that were not originally intended for an aquarium. Once in the perfect position, these aquariums become a mesmerising piece of design that unveils the true magic of the underwater world.

SPECIFIC SIZES AND A MINIMALIST DESIGN

OASE StyleLine aquariums are available in three sizes: StyleLine 85, 125 and 175.

Depending on the space you have available and what you want from your aquarium, you can set up a compact or more substantial underwater landscape. You can also order each tank on its own or with the matching cabinet in black or white.

TOP TECHNOLOGY TOO

Whether you are most interested in design or technology and equipment, a complete StyleLine set includes everything you need to get started. And it offers everything you could ask for from a quality perspective.

The discreet internal corner filter keeps the water crystal clear and is easy to remove for maintenance. The opaque glass cover is also easy to clean because it can be completely removed. The LED lighting kit promotes plant growth and showcases the beauty of your aquarium inhabitants.

Inspiration

YOU HAVE THE DREAM. WE SHOW YOU HOW TO MAKE IT A REALITY.

Aquariums have fascinated people for thousands of years. In ancient Chinese culture, emperors were known to have kept precious fish in artificial ponds. Fortunately this hobby is no longer as exclusive as it once was. Anyone can create their own underwater landscape at home.

There is a suitable spot for an aquarium in virtually any living space. The main requirement is that the aquarium is not exposed to direct sunlight. An unremarkable plain wall is often the ideal spot for an aquarium to add a touch of magic.

Once you have found the right place, get started right away. It has never been easier to transform the dream of owning an aquarium into reality with an underwater world of your own. There is no limit to what you can create with the aquarium sets from OASE.

LET US INSPIRE YOU!

NATURE MEETS DESIGN

A fascinating nature experience transformed into an elegant piece of design: The aquariums in the ScaperLine collection can be a stylish centrepiece in any living space.

ScaperLine 100 in matt grey

HighLine 600 in matt black

PURE RELAXATION
