

The ideal framework for the art of aquascaping

ScaperLine aquariums

LIVING WATER

Oase

LIVING WATER

Getting to know OASE

WE HAVE DEDICATED OUR HEART AND SOUL TO WATER – AS AN ELEMENT FOR DESIGNING LIVING SPACES FOR PEOPLE, AQUARIUM INHABITANTS AND PLANTS. THE PLAYFUL NATURE OF WATER HAS BEEN OUR SOURCE OF INSPIRATION FOR CREATIVE WATER SCENES IN GARDENS AND AQUARIUMS SINCE 1949.

We are developers by trade and composers at heart. This philosophy has enabled us to set milestones in the field of aquarium design – from our HighLine premium aquariums and the renowned BioMaster external filters to ORGANIX, one of the world's highest-quality fish foods.

With all this experience under our belts and our customers' trust to back us, we are now taking the next logical step: presenting the new world of OASE ScaperLine aquariums. A range packed with expertise, full of new ideas and bursting with enthusiasm, which also meets the most stringent requirements. By professionals for professionals.

Sincerely,

Thorsten Muck
Chief Executive Officer

Contents

Aquascaping

A philosophy that promotes inspiration from every aspect of nature, with special attention to detail in the creation of small-scale underwater landscapes. This need for perfection is also what drives the development of our products and technical solutions.

06 AQUASCAPING AND THE JOY OF COMPOSITION

ScaperLine

ScaperLine includes aquarium tanks and cabinets in various finishes, as well as soil and care products. All components complement each other perfectly for the setup, creation and maintenance of unique underwater landscapes, which add fantastic touches to any living space. Let us inspire you with our components and solutions!

Aquascaping and the joy of composition

This passion is a unique philosophy for the design of underwater landscapes. These scenes are inspired by the beauty of nature in all its facets. Every little detail is given the same level of dedication as the overall result.

Passion and creativity come together to set the tone. High-quality materials, plants and fish – plus a little care and patience – are as important to the aquascaping philosophy as being able to enjoy your own design for a long time after it's complete.

The beauty of nature serves as the basis and the inspiration. There are virtually no limits to your imagination.

Aquaristics or aquascaping?

The difference between the two has nothing to do with the quality of the aquarium or the amount of creativity, care and devotion shown by its owner. Generally speaking, aquascaping showcases the beauty of the plants and they are the main focus, whereas with aquaristics, fish and other aquatic animals take centre stage. OASE is the perfect partner in both cases.

THE DETAILS PERFECT THE ARTWORK

In aquascaping, every detail counts – the shapes and shades of the stones, the intensity and colours of the plants, or even the position of all the elements in the aquarium.

ScaperLine – quality for artistic freedom

If you're looking for ways to translate your passion for aquascaping into reality, look no further than our ScaperLine range. These products will help you create artistic landscapes that dreams are made of and avant-garde water gardens you'll never want to leave. This series is not only expansive but high quality too, featuring premium materials with exquisite workmanship and ranging from care products to the very latest innovative technology. We are passionate about helping aquarists bring their most creative design ideas to life and we channel our passion for perfection into every product we offer, right down to the last detail.

Perfection in every detail

OASE ScaperLine means innovation and perfection when you are selecting the elements for and creating your aquatic landscape. This claim extends to all of our materials, products and technology. There is no trade-off between functionality and design – they complement each other perfectly.

ALL-AROUND AESTHETICS – OPTIONAL BACK WALL

A back wall can be attached to allow the ScaperLine set to be used as a room divider. This covers the back of the base cabinet, opening up completely new design opportunities.

BRIGHT COLOURS – MITRE-CUT GLASS

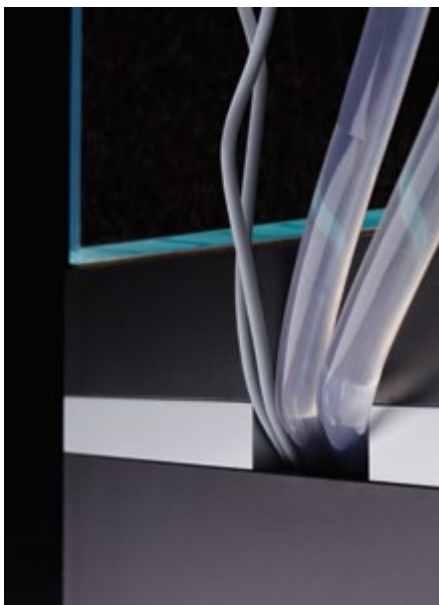

White glass provides authentic, bright colours. The edges of these mitre-cut glass walls are carefully glued together by hand, creating a stylish, bright frame for your work of art.

Nuanced design –
manufacturer-quality
base cabinet

COORDINATED MINIMALISM – NO CONFLICT BETWEEN FUNCTION AND DESIGN

The push-to-open as well as the soft-close function ensure that your underwater inhabitants are not subjected to any stress when opening or closing the doors.

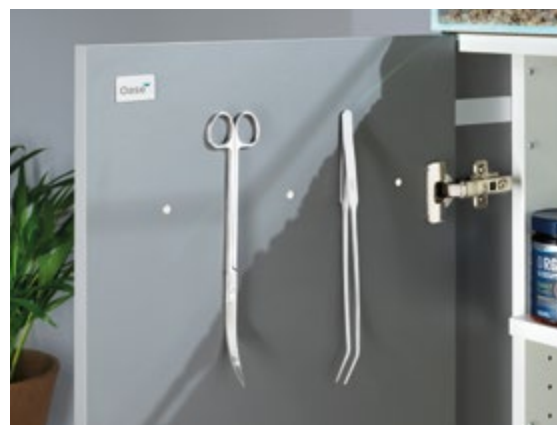

CABLE AND HOSE ROUTING

The cable feedthrough in the base cabinet can be sealed if required and is almost invisible.

With the smart design panels, cables and hoses are elegantly guided into the base unit. The feed-through can also be optionally closed by a cover over the entire length. Furthermore, OASE offers a design panel with CO₂ feed-through as an accessory, specially designed to meet the needs of scapers.

Functional features – innovative integrated

CLEVER CONVENIENCE – BASE CABINET WITH OPTIMUM USE OF STORAGE SPACE

The cabinet for our ScaperLine series is equipped with a pull-out shelf, which can be used to house the BioMaster external filter. Holders for towels and nets are joined by magnets for holding scissors, tweezers and other equipment, so everything is exactly where you need it to be.

**THE BIGGER PICTURE – SEEING EVERY
LITTLE DETAIL AS PART OF THE WHOLE**

All components are highly developed in their own right and perfectly coordinated down to the last detail. This is the true philosophy of aquascaping.

Perfection in every detail –
all the elements you need
for your dream landscape

ScaperLine, the perfect premium equipment

We offer everything you need to design and care for your ScaperLine aquarium landscape – and more. Our range extends from tanks of different sizes, lighting, filters and the electronic aquarium control system to exclusive manufacturer-quality base cabinets and the perfected range of OASE aquarium care products. Perfection in every detail and all from a single source.

SCAPERLINE SET (page 16)

The ScaperLine aquarium and manufacturer-quality base cabinet are also available separately. Together, they form the ScaperLine set.

LIGHTING (page 30)

Bring the water to life with the right lighting.

- HighLine Premium LED
- HighLine Premium LED lighting kit

OASE CONTROL (page 28)

The smart lighting control system allows you to simulate dynamic lighting conditions.

FILTER (page 20)

Use the BioMaster or BioStyle filter to set the optimum filtration.

- **BioStyle**
- **BioMaster Thermo**

OASE AQUARIUMACTIV

(page 24)

Choose optimum care for your dream landscape.

- **ScaperLine MineralMix**
- **ScaperLine daily fertiliser**
- **ScaperLine Plant Boost tablets**

SCAPERLINE SOIL

(page 23)

Our aquarium soil provides the perfect substrate.

- **Brown ScaperLine soil**
- **Black ScaperLine soil**

ACCESSORIES (pages 18, 19, 26)

Caring for your aquarium is a pleasure with the right accessories.

BioMaster Thermo

SAFE AND PRACTICAL

No more dismantling the filter! The EasyClean pre-filter module can be removed, rinsed and replaced. The venting button ensures easy startup after cleaning.

QUIET AND ECONOMICAL

The pump runs quietly, without making any irritating noises – and it also saves energy.

STURDY AND CLEAN

The combination of mechanical and highly effective biological filtration ensures clear, healthy aquarium water.

External aquarium filters that offer maximum convenience

Smart up your home!

One app for the entire smart world of OASE: OASE Control is the control centre for all the smart products in the OASE and biOrb by OASE ranges. Control your compatible pond technology, aquarium and vivarium conveniently and efficiently using one app.

THE AQUARIUM CONTROLLER – THE HEART OF SMART LIGHT CONTROL

The Aquarium Controller even allows you to control individual segments of your HighLine Premium LEDs. The Controller is the heart of the system, keeping the connected devices running smoothly. Even when you're on holiday or on the move, the system will keep you updated before your underwater world gets out of balance. OASE is constantly working to improve the system, and regular app updates mean that you always have access to the latest developments. This smart solution ensures that you'll always have the latest innovations at your fingertips.

Premium lighting

**THE IDEAL CHOICE FOR YOUR AQUARIUM –
CONTROLLABLE VIA AQUARIUM CONTROLLER OR IR CONTROL**

ALSO AVAILABLE AS A KIT

The kit also contains all the necessary connections.

LASTING QUALITY

100 % waterproof construction (IP68) protects LEDs from external influences – and you from having to purchase replacements.

HANDY CONTROL VIA SMARTPHONE OR TABLET

Even more convenient – Use the optional OASE Aquarium Controller or IR Control for more ways to manage your lighting.

RICH COLOURS

Ideal for the different lighting requirements of aquarium inhabitants and plants. LED colours (neutral white, cold white, royal blue, red) allow a wide, natural colour spectrum.

CONSTANT BRIGHTNESS

Thanks to state-of-the-art lighting technology, the OASE HighLine Premium LEDs provide consistently bright light for almost their entire service life.

LIGHT AT THE TOUCH OF A BUTTON

The IR Control Set with a handy remote control and pre-set daily schedules controls colour and brightness. Includes integrated timer.

STATE-OF-THE-ART MODULES

The latest LED technology with segments that can be controlled separately for individual lighting effects.

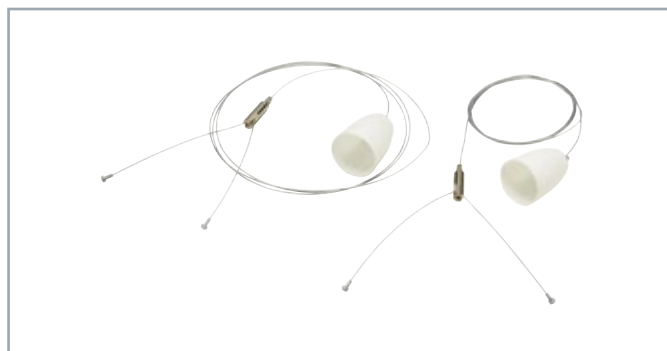

THREE INSTALLATION OPTIONS

Depending on the desired lighting effect, the HighLine Premium LED solution offers three different options.
